About me

I am a computer science student on the cusp of graduation from the KTH Royal Institute of Technology. With a robust work ethic and a keen interest in achieving results, I continually strive to expand my knowledge base. My background includes rigorous training as a Ranger Soldier at the Swedish Army Ranger Battalion (K4), equipping me with solid leadership and operational planning skills. My education has refined my technical prowess, enhancing my aptitude for creative problem-solving and critical thinking. Curious by nature and flexible in approach, I am ready to leverage my analytical and inventive strengths in a vibrant IT role.

Work Experience

Frontend developer, Flygresor.se

March - June 2024

Mobile UI/UX optimization for the last-minute travel page

Manager, MW Group Stockholm

2021 - Present

Consulting assignments with various corporate clients.

Key assignment: Security Manager at Stockholm Arlanda Airport.

Product Owner / Frontend Developer, AFRY

2023

In my role as Product Owner at AFRY, I was not only responsible for developing the frontend of a Book and Claim system related to sustainability but also took on the leadership responsibilities for overseeing the delivery of the system. I managed a team, ensuring that all members were aligned with project goals, timelines were met, and the end product upheld the highest quality standards.

Ranger Soldier, Army Ranger Battalion (K4) Arvidsjaur

2019 - 2020

I specialized in precision marksmanship (AG 90) and was responsible for long-range reconnaissance and surveillance to support mission objectives. Additionally, I completed basic medical training. These experiences have sharpened my attention to detail, strategic planning, and risk assessment abilities, as well as my capacity to remain composed and effective under pressure.

Salesperson, Förebygg Stockholm

2020

Sales of ID protection services B2C and B2B

Education

Computer science, KTH Royal Institute of Technology

2020 - 2024

Natural Science, Midsommarkransens Gymnasium

2016 - 2019
